

Sight words

We had been learning the following sight words in school before Christmas, please revise with your child. Print them out, or if you don't have a printer write the words out. Practise each word individually with your child. When your child is sure of the words you can play some games –

- Snap – 2 sets of the words needed. Each player has a set of the words faced down in front of them. Taking turns each player takes a card from their pile turns it over and puts it down in the middle between the two players. The next player takes their turn. If the words match, whoever says SNAP wins the cards. To help your child with their sight word knowledge, encourage them to say their word as they place it down in the middle.
- Pick a card – play with one or two sets of words. All words are face down in a pile between the two players. Player one chooses the top card, turns it over and reads the sight word. If they can read it, they can keep it in their pile. If they do not know it, say the word with your child and put word to the bottom of the pile.
- I Spy – Play the game I Spy by describing the tricky word. e.g “I spy with my little eye a tricky word that has three letters. Two of the letters are tall” The player then has to identify and read the word ‘the’. Players can take turns challenging each other.
- Cut the words out and stick them onto blocks and Lego, read the word when you're building your block towers, put the word into a sentence

the	Was	she
I	me	we
said	to	he
be
